

A GOOD SMILE  
CHANGES  
EVERYTHING.

[atteliadental.com](http://atteliadental.com)

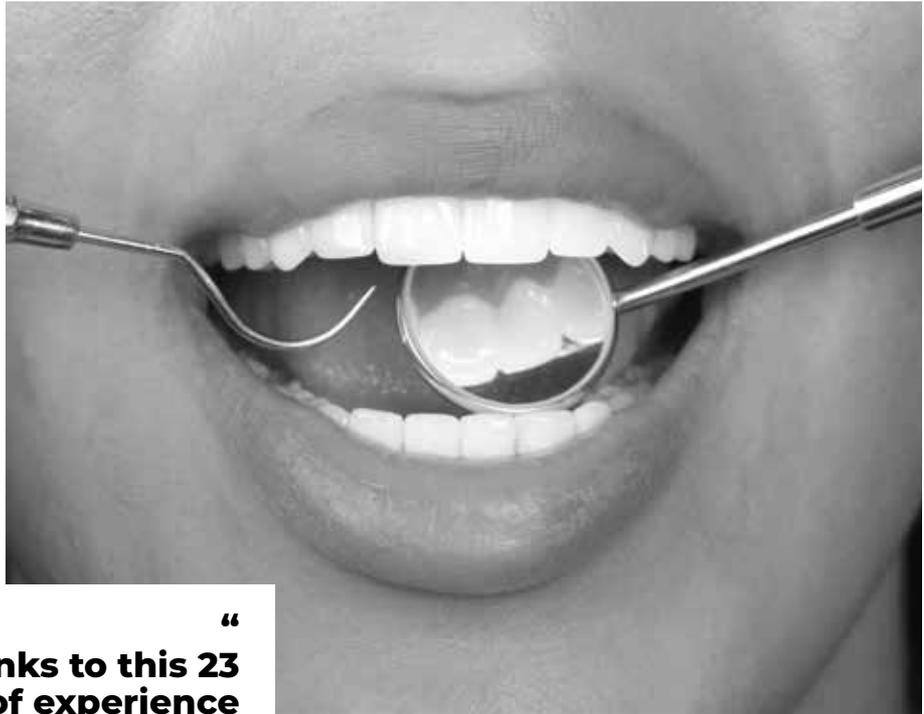

**ATTELIA**<sup>®</sup>  
MILLION DOLLAR SMILE

# WELCOME TO AWARD WINNER, MOST EXPERIENCED DENTAL CENTRE IN TURKEY!

We offer the latest dental technology operated by highly experienced dental professionals. Founded in 2000 by Turkey's most popular dentist, Dr. Mehmet İşlek, Attelia Oral and Dental Health Centre provides the highest level of quality with exacting international hospital standards, and is probably the most experienced in Turkey.

**FLAWLESS  
HAPPINESS**

“  
**Thanks to this 23  
years of experience  
with millions of  
international  
patients from all  
over the world.**

As Attelia Oral and Dental Health Centre, our main purpose is, to provide the high quality with affordable prices for the patients who are seeking for their dream smile. Attelia Oral and Dental Health Centre is the first dental centre which has started Dental Tourism in Antalya, thanks to this 23 years of experience with millions of international patients from all over the world, Attelia has an incredible experience to complete even the most complicated treatments in a very short time of period.

We know very well that we owe this success and comfortable treatment which we provide has been deriving from our amazing team, our experienced dentists, nurses, technicians and our International Health Department, you will enjoy your holiday while you are having the best dental treatments.

# A CLINIC USING THE LATEST DENTAL TECHNOLOGY

While designing your new smile we utilise the latest dental technology. In our in-house laboratories our expert dental technicians, using a wide range of the latest innovative dental technology and skill, design the smile of your dreams. For instance, the 3D CAD-CAM system allows us to design your perfect smile using zirconium smart ceramics.

## **International Sterilization Standards**

The clinical care and health of our patients is so very important to us. Following very strict hygiene policies, our sterilisation and disinfection techniques meet the highest of international standards. Our patients can be secure in the knowledge that the sterilisation processes used in our clinic, which are constantly monitored, guarantee that all dental tools are completely sterile before use. Following strict hospital guidelines, specially trained personnel hermetically seal sterilised items in a spotlessly clean environment.

### **CEREC® Technology**

Before the advent of the CEREC® CAD-CAM dental restoration system, treatment for dental veneers would take about seven days – we can now provide this treatment on the same day. For quite some time our clinic has utilised the CAD-CAM dental restoration system, one of the dental miracles used around the world. The treatment involves taking an infrared picture of the patient's existing teeth, and using the necessary computer software, a new design is made to restore the patient's smile. Utilising this system we provide high-quality ceramic crowns, ceramic dental laminates, dental veneers, inlays and onlays on the same day for our patients coming from abroad.

### **Panoramic X-Ray**

It is commonly performed by dentists and oral surgeons in everyday practice, and may be used to plan treatment for dentures, braces, extractions and implants.

### **NewTom Volumetric Tomography**

Dental tomography offers the physician the ability to assess the patient's bone density for implant planning. For this assessment, the tomography results are transferred to five-dimensional computer software, allowing the dentist to determine the healthiest positioning, regarding size and angle, of the intended implant for the patient.

### **PRP Equipment**

Platelet-rich plasma (PRP) therapy, uses injections of a concentration of a patient's own blood platelets to accelerate the healing in dental procedures. The procedure involves the releasing of growth factors that stimulate the stem cells, which cause blood clotting and the production of new tissues, helping to heal wounds quickly. Platelet-rich plasma (PRP) therapy is especially used for dental implant procedures, such as; bone grafting, sinus lift, and bone defect fistula repair between the mouth and sinus cavity.

### **Dental Laser Equipment**

Lasers come under two classifications: those for soft tissues, and those for hard tissues, and are used in a variety of dental treatments, such as; pain reduction, removal of tooth decay, the disinfection of a root canal, gingival lightening (gum colour), reducing sensitivity in sensitive teeth, blood clotting after tissue invasion, welding titanium framework on multiple implants, treatment of herpetic ulcers, decontaminating of implants, provide impeccable accuracy and visibility for the dental surgeon, and they reduce the time of procedures.

**“  
Utilising the latest  
scientific and  
dental technology  
we aim to perform  
high-quality and  
memorable  
treatment for our  
patients.”**

## Digital Smile Design (DSD)

While presenting you with designs that will make you feel the smile of Hollywood stars; we aim to protect your dental health with minimal approaches. For this, we offer you perfection by using the state-of-the-art digital smile design technology which is our most best supporter. The digital smile design begins with a series of professionally taken photos taken from the patient and then is planned with a comprehensive workflow during the treatment. While planning the aesthetic restorations desired by the patient, all criteria such as the patient's expectations and needs, age, golden ratio symmetry, facial analysis, gingival condition and level are taken into consideration. Our clinic has all the equipment used in digital smile design as well as the technical staff to produce aesthetic algorithms. Our specialist doctors offer you smile designs specially designed

for our patients in Digital Smile Design before treatment. The dental coatings we use in our Smile Design treatment solutions afterwards are the most advanced dental Technologies, the CEREC, CAD-CAM systems in Attelia laboratories. You may chose according to your taste from the unlimited color chart of our dental blocks; from the most natural level to Hollywood White, and thus you have a million dollar smile.

# ALL DENTAL TREAT- MENTS

WE OFFER ONLY THE  
BEST INTERNATIONALLY  
RECOGNISED IMPLANT  
BRANDS.

Attelia Oral & Dental Health Center is at your service for your dental treatments with state of the art technologic methods and devices, A grade materials, and a guarantee for each one of your dental treatment.

“  
**Our experienced dentists in Antalya ensure that all treatment is performed to very high standards. Our dental centre offers dental guarantees for all dental treatment, and a lifetime guarantee for dental implants.**

## DENTAL IMPLANTS

### TREATMENT TIME: 1-3 DAYS

Our specialist dental surgeons have successfully performed over million dental implant procedures. That experience, together with the latest technological dental equipment, allows us to offer a unique dental health experience for patients visiting our dental clinic.

We guarantee satisfaction not only from the standard of care to our patients, but also at prices that are approximately 70% cheaper than in the UK, USA and other European countries. And that is across the board whether the patient needs a single implant, or a complete implant restoration of the upper and lower jaws.

## ALL ON 4™

### TREATMENT TIME: 2 DAYS

With our international patients always in mind, we at Attelia can now offer full 'All-on-Four' dental implant treatment in as little as 2 days.

Utilising the latest technological standards, and depending on the patient's health, the dentists and technicians in our clinic can complete the 'All on Four' treatment within 2 days. We achieve this by taking the necessary measurements for the dental prosthesis immediately after implantation. Using the EXOCAD software, in conjunction with an Extra Oral Scanner, the design is immediately transferred to a 3D printer resulting in a new permanent prosthesis within hours.

## NON-SURGICAL IMPLANT COMPUTER GUIDED IMPLANTS

### TREATMENT TIME: 1 DAY

Non-Surgical Implantation does not involve making incisions into the patient's gums, as is usual in other implant procedures, and therefore, negates the need for sutures after the procedure has been completed. With no incisions, it is generally not necessary to apply local anaesthesia, however this is available for those patients with sensitivity issues.

In the next stage, the surgeon will take a mould of the patient's teeth to create a translucent acrylic base plate. This, together with the aid of a computer guide, will allow dental surgeon to study the best positions to insert the implant(s).

We believe that non-surgical implantation, using the guiding computer, gives far superior results than other implant procedures. The Non-Surgical implantation process takes between 1- 5 minutes.

### The Benefits of Guided Implants:

- No incisions or sutures
- Expeditious procedure
- Expeditious healing time
- Minimal pain and discomfort
- Predictable positive results

## DENTAL CARE & TREATMENTS

### DENTAL VENEERS

**TREATMENT TIME: 3-6 DAYS**

Our clinic, offers the best quality, 'A' class, teeth veneers for the patient who wishes for a perfect and aesthetic smile expeditiously.

### SMILE MAKEOVER

**TREATMENT TIME: 4-7 DAYS**

While preparing a new smile design, or smile makeover, for our international patients, we precisely examine many important dental criteria.

### DENTAL CROWNS

**TREATMENT TIME: 4-5 DAYS**

Metal supported porcelain crowns can be used to replace a single tooth, or as a bridge. The metal alloy in the substructure of the tooth formation is extremely durable.

### TEETH WHITENING

**TREATMENT TIME: 1 HOUR**

Our cosmetic dental specialists using the very latest in 'Zoom Whitening' dental technology, can provide tooth whitening in about an hour.

### DENTAL BRIDGE

**TREATMENT TIME: 3-6 DAYS**

Treatment for a dental bridge involves creating multiple crowns joined together, these are anchored on healthy teeth on either side of a gap created by one or more missing teeth.

### GENERAL ANAESTHESIA SERVICES

**TREATMENT TIME: 1-6 HOURS**

Our specialist anaesthetists can safely administer general anaesthesia, as well as the intravenous administration of sedatives.

## PERIODONTOLOGY & PERIODONTOL DISEASES

**TREATMENT TIME: 4-5 DAYS**

Periodontology analyses and treats diseases of the soft tissues that surround and anchor the teeth (periodontal ligament & gums) and the harder bone tissues such.

## INLAY & ONLAY RESTORATIONS

**TREATMENT TIME: 1-2 DAYS**

These aesthetical solutions are usually used when there is not enough dental material remaining, or for teeth that have been too damaged to warrant veneering.

## ROOT CANAL TREATMENT

**TIMESCALE: 1 DAY**

Root canal treatment is essential in cases where the patient has either, infection in their tooth root, or, where the patient is suffering from undue sensitivity.

## COMPOSITE FILLINGS

**TREATMENT TIME: 1 DAY**

Composite fillings have many advantages compared to metal fillings. The colour of composite fillings can be chosen to match the natural tooth colour of the patient.

## GUMMY SMILE CORRECTION

**TREATMENT TIME: 1 DAY**

A 'Gummy Smile' is a condition where a person's teeth appear abnormally small when smiling. Treatment is determined according to the appearance of the gums and periodontal condition of the teeth.

## LASER GUM TREATMENT

**TREATMENT TIME: 1 DAY**

In approximately one hour our clinic's expert gum disease specialist, utilising the latest laser-assisted treatment, will restore gum health, and remove any discomfort.

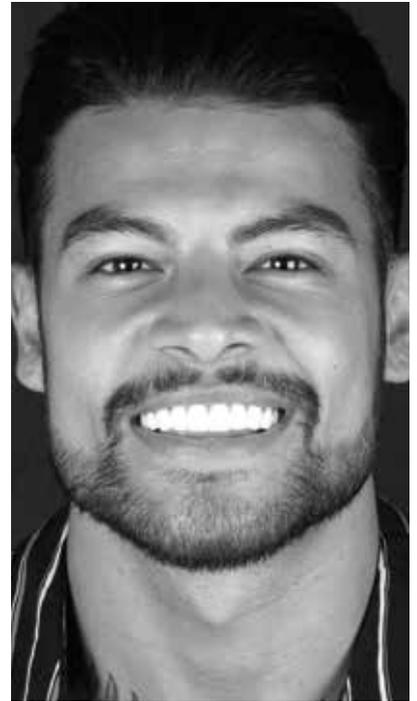

# HAVE THE PERFECT SMILE OF YOUR DREAMS

**Smile Makeover**  
Zirconium

**Smile Makeover**  
Zirconium

**Million Dollar White**  
Implant + Zirconium

**“  
Creating  
beautiful  
smiles  
for over 23  
years.**

If you'd like a fresh new smile that looks natural, hides gaps, stains, chips and crookedness, then porcelain veneers could be the answer. Incredibly strong and aesthetically pleasing, veneers can make long-lasting changes to your smile with very minimal tooth preparation. Porcelain veneers are fantastic at resisting stains and mimic your teeth in reflecting light. We are creating beautiful smiles for over 23 years.

**Million Dollar Smile**  
Zirconium

**Million Dollar Smile**  
Implant + Zirconium

**Smile Makeover**  
Zirconium

Before treatment, our dental team will consider the patient's gum shape, the size of the teeth, the shape of the teeth and how they look when opening and closing the mouth. It is important to think about the proportion of the teeth and how far they extend in relation to the mouth, while at the same time, our team will consider the healthy aspects of the final smile, all the while bearing in mind the patient's wishes.

“  
**Get  
better  
smile,  
teeth and  
services.**”

YOUR  
DREAMS  
COME  
TRUE  
WITH US  
SINCE  
2000.

# SMILE LIKE HOLLYWOOD STARS

**The Smile Design we  
in Turkey employs  
aesthetic dental**

**offer at Attelia  
professional  
physicians.**

Since the year 2000, our “Smile and Dental Health Centre is most popular in Turkey. Our experienced only use the latest technology in dental health equipment. Working with computer-aided 3D design software, integrated with CAD-CAM and CEREC technology, our physicians and technicians can expeditiously create a new smile for the patient, while leaving them with time to enjoy a pleasant holiday in Antalya.

Studio” at Attelia Oral considered to be the cosmetic dentists

The patient's age, dental analysis, gingival level, facial analysis, lip analysis and the patient's wishes, are all taken into consideration before any treatment commences. A beautiful smile positively affects one's daily life, and improves social relationships. Our Smile Makeover not only provides the patient with a perfect smile, but also corrects other dental problems they may have. The treatment will provide the patient with a more youthful appearance and prevent unwanted facial wrinkles.

“  
**Have the  
 perfect smile  
 of your  
 dreams.**”

“  
**The Smile Design we offer  
 at Attelia in Turkey employs  
 professional aesthetic  
 dental physicians.**”

While preparing a new smile for our patients, we precisely examine many important dental criteria.

“  
**Hollywood  
 Smile Design  
 in Turkey.**”

The Hollywood Smile Makeover has emerged in recent years with more and more patients wishing to have the beautiful white teeth that Hollywood actors and actresses dazzle us with. We can swiftly provide that Hollywood Smile for our patients at Attelia Oral and Dental Health Centre.

Our expert laboratory team can create the whitest of white teeth in our in-house laboratory, while at the same time they can temper that white, using colour swatches, to the patient's desired colour tone.

# GENERAL ANAESTHESIA SERVICES

As mentioned, Attelia Oral and Dental Health Centre includes two fully equipped operating theatres for the safe administration of general anaesthesia, and where we can offer dental treatment (under sedation) for patients with severe dental phobia, who are disabled, or who may suffer from nausea. Patients are welcome to have a friend or family member come along and sit with them during their dental treatment.

“  
**General anaesthesia takes place only after a detailed evaluation of the general condition and medical history of the patient has taken place.**

While undergoing their dental treatment, the patient will be supervised by a team of fully qualified anaesthetists and nursing assistants. While the patient sleeps our professional dental surgeons will work to provide them with a beautiful new smile.

General anaesthesia is performed in operating theatre conditions and causes the loss of sense and

“

**We also provide a comfortable VIP rest room for patients recovering from anaesthetics.**

consciousness in a patient. Sedation is a state of sleep, and both are created by delivering drugs intravenously, adjusted under the careful eye of a professional anaesthetist, thus maintaining the vital reflexes of the patient, such as breathing (via respiration gasses) and swallowing. General Anaesthesia Services Turkey The patient is connected to the anaesthetic apparatus through a sterile tube inserted in the trachea; the vital functions of the patient such as pulse, respiration, blood pressure, concentration of oxygen to the tissues, and body temperature are controlled by our fully trained anaesthetist. The patient and environment are prepared for emergency intervention, if required.

The patient is awoken from anaesthesia under the care of our reanimation specialist at the end of the procedure, and monitored until the patient recovers completely.

Anaesthetics cause temporary retrograde amnesia, with the patient not being able to remember any discomfort at the beginning of dental procedure. The general anaesthesia procedure is an excellent choice for the patients who suffers dental phobia.

# OUR EXPERIENCE AND TALENT ARE CROWNED WITH AWARDS.

Attelia, established in year 2000, is Turkey's largest dental clinic. Our specialist dentists provide painless and internationally approved services in 30 patient rooms at the same time at highest standards. Attelia Oral and Dental Health Center has General Anesthesia facility in two different operating rooms. Our technicians design and manufacture teeth in the shortest time in our in-house laboratory.
